

Warsaw, 13th December 2022.

INFORMATION

on the selection of the best bid in the procedure No. 163/2022

Project concerned: "3D bioprinted liver tissue with vascular system as an innovative model for assessing drug toxicity and effectiveness of oncological therapies" which is financed under the Smart Growth Operational Programme 2014-2020.

1. Conducting the proceedings:

Polbionica Sp. z o.o.
ul. Rydygiera 8
01-793 Warszawa
Tel: +48 518 785 622

2. Subject of the request:

The subject of the inquiry is the purchase and delivery of 3D printer, which will be used to perform industrial research and development works planned under the implementation of the project: "3D bioprinted liver tissue with vascular system as an innovative model for assessing drug toxicity and effectiveness of oncological therapies".

3. Result:

We would like to inform you that the Bid Commission on December 13, 2022 selected the most advantageous offer submitted by the company:

Cellink Bioprinting AB
Långfilsgatan 7
412 76 Gothenburg
Sweden

4. Substantiation:

The Bid Commission evaluated one (1) offer submitted for formal and substantive evaluation, as a result of which the offer of Cellink Bioprinting AB was selected. This offer obtained the highest number of points offering the best implementation conditions and meeting all the criteria of the inquiry No. 163/2022 (including the lowest price), which resulted in the award of 100 points.

The Contractor's Selection Report was prepared on December 13, 2022.
